

HKU-Cambridge Undergraduate Recruitment Scheme (Engineering and Computer Science)

The University of Hong Kong (HKU) is pleased to announce the collaboration with the University of Cambridge in launching HKU-Cambridge Undergraduate Recruitment Scheme (Engineering and Computer Science). It is the first international Engineering scheme offered by the two top institutions in the world, which allows graduates to receive two Bachelor and one Master degrees upon completion of the five-year study.

Scheme details are as follows:

1st Year

- Students admit to **HKU** Bachelor of Engineering (BENG) / Bachelor of Engineering in Engineering Science (BENG(EngSc)) offered by Faculty of Engineering.
- At the beginning of first semester in Year 1, HKU will nominate students to be assessed by the University of Cambridge. After passing Cambridge's written tests and interview, students will be given a conditional offer with condition on CGPA requirement. Students successfully meet the condition will be transferring to Cambridge for Year 3 and Year 4 study in bachelor degree and followed by with a Master of Engineering.
- Students who do not meet the conditional requirement will continue their studies in BENG/ BENG(EngSc) at HKU.

2nd Year

- Students study BENG(EngSc) at **HKU**.

3rd Year

- Students study Engineering / Computer Science at their first year of study at the **University of Cambridge**.

4th Year

- Students study Engineering / Computer Science at their second year of study at the **University of Cambridge**.
- Upon completion, students may apply for a **Bachelor of Arts degree from the University of Cambridge**.

5th Year

- Students study Master of Engineering at their third year of study at the **University of Cambridge**. Upon completion, students will receive a **Master of Engineering degree from the University of Cambridge** and also may apply for a **BENG (EngSc) degree from HKU**.
- Students will also be eligible for professional accreditation and to practice in the UK, Hong Kong and the Mainland, subject to the usual institutional process.
